

A quality rep firm does more than sell equipment. To provide its customers with the best service, a rep firm must have...

Experience

Wescor provides cost-efficient and environmentally-friendly solutions for commercial and industrial HVAC projects—our record proves it.

- In business since 1979
- Has always specialized in green and energy-saving products
- LEED and DOE accreditation

A diverse product mix

With our diverse product mix, we have energy-saving and environmentally-friendly solutions for:

- Air handling
- Air purification
- Compressed air system controllers
- Compressed air treatment
- Dehumidification
- Energy recovery
- Evaporative cooling
- Transpired solar collection
- Water heating

Technical expertise

Our product experts can help you with:

- Information on the latest technology
- Design assistance
- Technical seminars such as lunch-and-learns
- Tax credits and utility rebates
- LEED and DOE issues

Local knowledge

- We cover Washington, Oregon, Idaho, and Alaska and know the technologies and products that work best for our region.
- Our offices in Portland and Seattle are staffed by knowledgeable people, including LEED and DOE accredited professionals.
- We know how to apply for local utility rebates and tax credits. We can help you with the required paperwork and energy savings calculations.

Let us show you what Wescor can do for you

We have the products, the expertise, and the solutions.
